

BioRain Ax on Watermelon Trial

BIOWORKS

100 Rawson Road • Suite 205 • Victor, NY 14564 • bioworksinc.com • 800.877.9443

BioWorks Products Included in Trial

BioRain A_x

Summary

Watermelons treated with BioRain A_x weighed approximately 14.5% heavier than the control. In observation, treated plants showed better rooting, were more vigorous with dark green colored leaves and showed better ground/soil coverage. The fruit on the treated plants showed less cracking and were more uniform and large in size (visual observation).

Trial	
Trial Surface	2.47 acres
BioRain A _x Rate	161.9 ml/acre*
Control Rate	-
Number of Plants	≈8,094/acre

Method Summary	
Crop	Watermelon
Location	Field
Application Method	By drip
Application Interval	1 application at transplanting and 1 application 3 weeks later*
Trial Design	60 fruits per plot, 10 fruits per location

*Miscommunication with the grower, he applied ONLY one application, at Transplanting
