ABOVE AND BEYOND IS WHERE WE BEGIN

GREENSPRING™

GreenSpring 1-0-0 is a mixed-mineral fertilizer formulated with essential micronutrients designed to support early-season plant establishment and optimize physiological performance. The formulation provides a readily available source of key nutrients during critical stages of crop development, promoting enhanced metabolic activity, vegetative vigor, and overall resilience to stress. When integrated into a production program alongside BioWorks biological crop protection solutions, GreenSpring supports a more robust crop management strategy and sets up crops for season-long health and productivity gains.

GREENSPRING HELPS MITIGATE THE NEGATIVE IMPACTS OF ABIOTIC STRESS DURING CRITICAL EARLY CROP GROWTH AND ESTABLISHMENT STAGES, PROMOTING SEASON-LONG IMPROVED PLANT VIGOR, ROOT DEVELOPMENT, AND PHYSIOLOGICAL PERFORMANCE.

ACTIVE INGREDIENTS

Nitrogen 1%, Sulfur 1%, Molybdenum 0.5%, Zinc 0.8%

FEATURES AND BENEFITS

- + Provides essential micronutrients that promote early season plant health
- + Enhances the ROI of IPM programs for a strong crop
- + Improves soil nutrient conditions to support strong root systems that begin early in the plant's life cycle
- + Improves stress tolerance to abiotic influences

WHERE TO USE

GreenSpring can be used in field, greenhouse, high tunnel and nursery production of ornamentals, vegetables, and fruits. Apply as a drench, in furrow, drip or foliar to the roots or foliage.

GREENSPRING™

PRODUCT INFORMATION

- + Available size: 1 gallon
- + Registered for use in the USA. Please refer to website for up-to-date state registration information: bioworksinc.com/products/greenspring/

SHELF LIFE

- + Store in a cool, dry place at or below 68 °F (20 °C)
- + Below 32 °F (0 °C): Do not freeze
- + Refrigerated 40 °F (4 °C): Not needed
- + Room temperature: 24 months
- + Above 75 °F (24 °C): Store cool

APPLICATION NOTES

- + Mix GreenSpring in sufficient water with agitation
- + Apply as a drip, in furrow, drench or foliar treatment
- + Thorough coverage of the soil or foliage is required
- + Stop applications prior to fruit development
- + Combine with RootShield® PLUS* to set crops up to handle the abiotic and biotic stressors of the growing season

APPLICATION RATES

- + Apply at 4.0-8.0 fl oz per acre
- + Dilute at 100 gallons of water applied per acre
- + 2-4 applications per growing season recommended with 14 days between applications
- + Tank mixing: GreenSpring can be tank mixed and is compatible with many common fungicides, liquid fertilizers, herbicides, insecticides, and biological control products

GOING ABOVE AND BEYOND

At BioWorks, we not only help eradicate harmful diseases and pests that threaten your crops, but we design and support integrated plant health management programs. And because we know how quickly some diseases can work, we respond to any questions you might have in just 48 hours. So you can get back to the business of successful growing.
