**SAFE. PROVEN. EFFECTIVE.**

For 25 years BioWorks has been helping customers in the horticulture and specialty agriculture markets to develop effective and efficient programs using products that are safe, proven and effective.

We are continuously reinventing the way our customers work by providing biologically based, integrated, safe solutions and programs.

**INSECT CONTROL**

BotaniGard 22WP is a biological insecticide for the control of adult and immature stages of aphids, thrips, whiteflies and more. BotaniGard 22WP is an excellent rotational partner with BotaniGard MAXX.

**SUPERIOR FORMULATION**

BotaniGard 22WP contains the highest spore concentration in a Beauveria-containing insecticide. BotaniGard is versatile enough to use as a stand alone, as a tank mix partner, or in rotation with other insecticide.

**UNIQUE MODE OF ACTION**

The applied spores infect directly through the outside of the insect’s cuticle. Spores adhering to the host will germinate and produce enzymes that attack and dissolve the cuticle. This allows BotaniGard to penetrate the skin and grow into the insect’s body.
BotaniGard® 22WP

A BIOLOGICAL INSECTICIDE (MYCOINSECTICIDE - WETTABLE POWDER)
