

# BotaniGard® MAXX

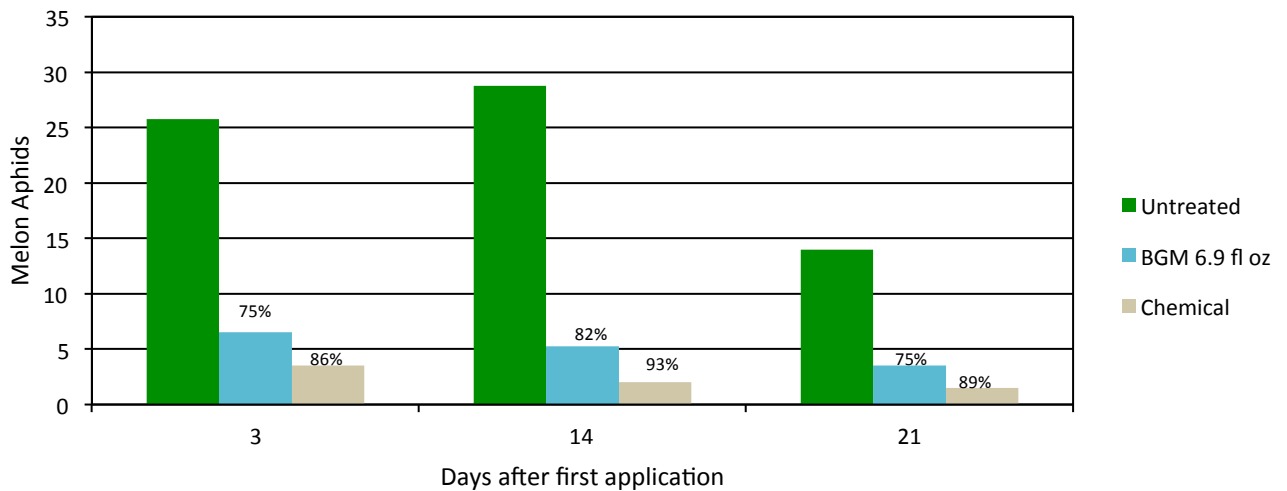

## Insecticide

### Melon Aphid Control on Muskmelons

After three weekly sprays on muskmelons, BotaniGard MAXX was shown to significantly reduce aphid populations compared to a chemical standard. BotaniGard MAXX was applied at 6.9 fl oz/acre. A conventional dual active ingredient insecticide containing imidacloprid + bifenthrin was used as the chemical standard.

Results showed 75% control of melon aphid after two weekly applications.
