Amt. of water (gal)	Rate per 100 gal equivalent					
	2.0 lb		3.0 lb		4.0 lb	
1	1.1 tbsp	9.1 grams	1.5 tbsp	13.6 grams	2 tbsp	18.2 grams
5	5.5 tbsp	45.4 grams	8 tbsp	68.1 grams	0.7 cup	90.8 grams
10	0.7 cup	90.8 grams	1 cup	136.2 grams	1.3 cup	181.6 grams
25	1.7 cups	227 grams	2.5 cups	340.5 grams	3.5 cups	454 grams

BotryStop bulk density = 0.56 g/cc

- Pre-mix/pre-slurry BotryStop in a separate container prior to adding to sprayer tank. Add to partially filled spray tank, then add additional water as needed. Ensure vigorous agitation during mixing (or shake well) and while spraying.
- Make application using the smallest droplet size possible for optimum coverage and reduced residue.

Note: To use the Small Volume Chart, first select the low (**2.0 lb**), medium (**3.0 lb**), or high (**4.0 lb**) rate per 100 gal equivalent column. Then move down the column to select the amount of product to mix into the corresponding water volume from the left column.
