## Potted Herb Nutrition Programs

---

Verdanta® biofertilizers are excellent for producing high quality potted herbs. Whether you are growing certified organic or conventional, in a container mix irrigated by drip, overhead, or subirrigated in troughs, Verdanta can improve crop growth sustainably. The nutrient sources in Verdanta promote stronger stems, more compact plants, and better foliage color. Both organic and conventional programs are shown below.

### Potted Herbs

*Such as: Basil, Chives, Parsley, Thyme, Rosemary, Lavender, Tarragon*

#### Conventional Programs:

- Option 1: 6 lbs/cu yd GM-2 + 1 lb/cu yd Micromax® + 20-10-20 water soluble at 100 ppm N 2x/week
- Option 2: 4.25 lb/cu yd EcoVita® or N-Vita™ + 4.25 lb/cu yd Osmocote® Plus 15-9-12 3 – 4 mo.

#### Certified Organic Programs (all products are OMRI Listed):

- Option 1: 6 lbs/cu yd EcoVita or N-Vita + 3 lb/cu yd Worm Power Granular
- Option 1a: 3 lb/cu yd EcoVita + 3 lb/cu yd N-Vita + 3 lb/cu yd Worm Power Granules
- Option 2: 9 lbs/cu yd EcoVita or N-Vita
- Option 2a: 4.5 lbs/cu yd EcoVita + 4.5 lb/cu yd N-Vita
- Option 3: 6 lbs/cu yd EcoVita or N-Vita + Verdanta PL-2 at 100 ppm N 2x/week
- Option 3a: 3 lbs/cu yd EcoVita + 3 lb/cu yd N-Vita + Verdanta PL-2 at 100 ppm N 2x/week

#### Notes:

1. Technical sheets for Verdanta GM-2 (7-6-12), Verdanta EcoVita (7-5-10), Verdanta N-Vita (9-4-3), Verdanta PL-2 (2-0-6) and other nutrition products are available on our website: [www.bioworksinc.com](http://www.bioworksinc.com)
2. Verdanta biofertilizers are compatible with all other crop inputs
3. If Worm Power Granular is unavailable use another high quality vermicompost
