

RootShield® PLUS⁺ WP

RootShield PLUS⁺ WP is an organic biological fungicide with dual active ingredients that prevent a broad spectrum of root diseases and promote healthy root systems.

Active Ingredients: *Trichoderma harzianum* strain T-22
Trichoderma virens strain G-41

Benefits & Features

- OMRI Listed
- Grows in soil and on roots, shields roots from pathogens
- Seeks out, attacks and eats fungal pathogens
- Induces host resistance
- Active over wide temperature range (48-97 °F/9-36 °C)
- Grows in a broad pH range (pH 4-8)
- Well suited to a variety of soil types
- Enhances nutrient uptake
- Helps plants resist/overcome abiotic stresses and transplant shock
- Excellent tool for fungicide resistance management
- Compatible with many chemical and biological inputs
- Compatible with BCAs
- 0-day PHI with no MRL

SUSTAINABLE. SIMPLE. SUPPORT.

For over 25 years, BioWorks has been helping our customers to develop effective and efficient programs using safer, sustainable products - backed by a personalized approach to support.

At BioWorks, we strive to simplify the use of biologicals with our ongoing commitment to information, education, and service.

DISEASE CONTROL

RootShield PLUS⁺ WP provides preventative control of major root diseases including soilborne *Phytophthora*, *Pythium*, *Fusarium*, *Rhizoctonia*, *Cylindrocladium*, and *Thielaviopsis* species. RootShield PLUS⁺ controls disease for up to 12 weeks.

HEALTHY ROOTS

RootShield PLUS⁺ WP grows in soils and on roots shielding them against root damaging fungi, promoting healthier roots and increasing root mass potential.

MULTIPLE MODES OF ACTION

With dual active ingredients, RootShield PLUS⁺ WP prevents a greater spectrum of root diseases.

AN ORGANIC BIOFUNGICIDE WITH DUAL ACTIVE INGREDIENTS TO CONTROL ROOT DISEASES

PRODUCT INFORMATION

- *Trichoderma harzianum* strain T-22 and *Trichoderma virens* strain G-41
 - Available Sizes: 1 lb, 3 lb & 30 lb
 - Registered for use in the USA except AK
- REI & PHI**
- 4-hour REI, 0-day PHI

SHELF LIFE

Below 32 °F (0 °C):	12 months
Refrigerated 40 °F (4 °C):	10 months
70 - 75 °F (21-24 °C):	4 months
Above 75 °F (24 °C):	1 month or less

For use on greenhouse and nursery ornamentals, vegetables, herbs and fruits.
EPA registered: Reg. No. 68539-9 Est. No. 68539-NY-001
US Patent Approved: 9,681,668 MPS Code: 3887/White

APPLICATION NOTES

DRENCH & IRRIGATION

- Suspend RootShield PLUS⁺ WP in sufficient water with agitation
- Apply as a drench or through irrigation to greenhouse planting mixes and container nursery crops
- Constant agitation in a stock tank is required to maintain suspension
- Can be applied through low pressure watering nozzles, sub-irrigation or other drenching systems
- When using a fertilizer injector to drench, keep the injector pick-up tube screen at least 1-2 inches from the bottom of the tank
- Set the injector at 1:100

APPLICATION RATES

- Un-rooted or bare-root transplant dip: 0.25-1.5 lb/20 gal
- Soil, potting mix or other growing medium drench: 3-8 oz/100 gal
- In-furrow / spray / transplant starter solution: 16-32 oz/acre
- Greenhouse and field chemigation: 3-8 oz/100 gal
- Pre-plant dust: 0.03-3 lb/100 lb bulbs or tubers

Tank Mixing: RootShield PLUS⁺ WP can be tank mixed and is compatible with many common fungicides, liquid fertilizers, herbicides, insecticides and biological control products. Consult the RootShield PLUS⁺ WP Compatibility Chart for more information.

TECHNICAL SUPPORT

If you are a commercial grower with a question or if you want to discuss a particular issue, contact us.

Our team is ready to discuss your crop-specific issues or any questions you have about our products. We will provide you with rapid, comprehensive and personalized support.

THE STRAIN GAME

Not all biological strains are created equal. Strains from the same species can vary greatly in overall effectiveness. RootShield PLUS⁺ *Trichoderma* strains T-22 and G-41 were selected from thousands for their exceptional ability to control a broad spectrum of soil-borne diseases under a wide range of conditions.
